

Evolution now offering 'Fire Solutions'

As a valued client of Evolution, we want to inform you of our increased portfolio of services.

In September 2014 we introduced a **FIRE DIVISION** to supplement our existing security services.

This new Fire Division has the capability to offer:

- A full range of fire detection and alarms systems to BS5839-1:2013
- Fixed extinguishing systems
- Alterations and modifications existing systems
- Maintenance contracts for new and existing fire detection and alarm systems.

As you are now doubt aware, the law regarding fire safety changed in 2005 with the introduction of the Regulatory Reform Act. This law has put a greater onus on businesses and property owners so as an introduction to our fire services we are offering a **free Fire Audit** to our existing clients.

Every non domestic property or business must now complete a Fire Risk Assessment and regularly review fire safety. The review of the risk assessment is very important as businesses and buildings change over time and the fire detection and alarm system is often overlooked. We are here to help, by providing a free audit of your fire system together with a report detailing compliance with BS5839-1, highlighting any anomalies and providing recommendations to remedy any deficiencies.

How will you benefit from this free audit?

- ***Offers an opportunity focus attention on Fire Safety***
- ***Provides an independent overview of the automatic fire detection system and compliance with BS5839-1:2013.***
- ***Highlights areas or issues that may require attention***

If you would like to take advantage of our introductory offer, please contact:
